

CATALYST *for* CHANGE

HEALTHCARE INFECTION TRANSMISSION SYSTEMS (HITS) CONFERENCE

The Healthcare Infection Transmission Systems (HITS) Consortium promotes public health by reducing healthcare-associated infections through the integration of best infection prevention practices for environmental, person-to-person, as well as water and air transmission of pathogens in the healthcare setting.

Join us for this one-of-a-kind, multi-disciplinary event where researchers and experts from across related disciplines will work toward identifying research gaps and applying data-driven methods in the field.

Meet, greet and share ideas with the individuals and organizations who are growing and sustaining the industry, as we explore creative and innovative solutions to this global problem. We are confident that, regardless of discipline, attendees will find opportunities to be a part of the conversation and be a catalyst for change in reducing healthcare-associated infections.

> Major companies, industry experts and innovators with backgrounds in:

- Airborne transmission
- Building water health
- Environmental microbiology
- Environmental transmission
- Epidemiology
- Ethnography
- Hand hygiene
- Healthcare Environmental Services (EVS)
- Healthcare environments
- Healthcare facilities management
- Infection control
